

### Westerwold/annual ryegrass

Installation rapide = La clé du succès

- Installation rapide
- Germination à températures basses
- Accelerates ground cover & acts as nurse crop
- Disappearing rapidly!

## Caractéristiques

<b>Couleur</b>	
<b>Résistance au fil rouge</b>	
<b>Tolérance à la salinité</b>	
<b>Pérennité</b>	
<b>Installation</b>	

### Fast establishment = fast ground cover = preserving playing quality

Visual appearance is important, but the role of Quickston is above all to secure a quick establishment in difficult situations **and then disappear !**

### The perfect nurse crop

The low percent of Quicston that we recommend for mixtures is due to the fact that it's role is producing a quick ground cover but also allowing safe and fast establishment of the perennial species in the mixture.

### Quickston has a darker green colour than previous generations

This is sometimes an advantage for a more homogeneous appearance.

### Finer leaves

The leaf texture is finer and again an advantage in terms of visual appearance.

## Period of overseeding

*% of each species in the mixture*

Species	Characteristic	Late autumn	Winter / Early spring	Spring till autumn
Westerwoldicum turf types	Rapid green up	25	50	X
4turf perennial ryegrass	Summer & winter stress tolerance, low temperature germination	25	25	X
Rough-stalked meadow-grass	Shade tolerance	20	X	X
Diploid perennial ryegrass (Low temperature germination)	Wear tolerance & Rapid germination	30	25	X
Diploid perennial ryegrass (All)	Wear tolerance	X	X	100
Total		100%	100%	100%
